

## Contributors

**Savita Bailur** is a research associate in the Information Systems and Innovation Group, London School of Economics. She is also a senior researcher in the Innovations Group at the World Bank Institute.

**John K. Bennett** is an Archuleta professor of computer science and director of the ATLAS Institute at the University of Colorado Boulder.

**Edward Cutrell** is a Microsoft Research India manager of the Technology for Emerging Markets group. He is also an affiliate associate professor at the University of Washington Information School.

**Paresh Dave** is a communications lead at the Development Support Centre in Gujarat, India.

**Jonathan Donner** is a researcher at Microsoft Research India where he is a member of the Technology for Emerging Markets group.

**Andy Dearden** is a professor of interactive systems design in the Communication & Computing Research Centre at Sheffield Hallam University. He is co-chair of IFIP Special Interest Group 13.1 on Interaction Design & International Development.

**Leslie Dodson** is a PhD student in technology, media and society focusing on ICT4D at the ATLAS Institute, University of Colorado Boulder. Prior to pursuing her PhD, Dodson was a senior broadcast journalist with CNBC, MSNBC, NHK-Tokyo, and Reuters, reporting on emerging market economics and international finance.

**Vanessa Frias-Martinez** is a researcher at Telefonica Research in Madrid. Her research interests lie in the area of social computing, with a focus on the analysis of mobile digital traces as novel sources of human behavioral data. She holds a PhD in computer science from Columbia University.

**Rebecca "Beki" Grinter** is a professor in the School of Interactive Computing, and also by courtesy, the Scheller College of Business at the Georgia Institute of Technology.

**Scott R. Klemmer** is an associate professor of computer science at Stanford University where he holds the Bredt Faculty Scholar development chair. He has a dual BA in art-semiotics and computer science

from Brown University, and an MS and PhD in computer science from UC Berkeley.

**Gary Marsden** is a professor of computer science at the University of Cape Town in South Africa. He is the director of the university's center in ICT4D.

**Preeti Mudliar** is a doctoral candidate in the Department of Communication Studies, University of Texas, Austin.

**Tapan S. Parikh** is an assistant professor of information management and systems at UC Berkeley. He has an ScB in molecular modeling from Brown University, and an MS and PhD in computer science from the University of Washington.

**Neil Patel** is cofounder and CEO of Awaaz.De. He holds a PhD in Computer Science from Stanford University, and a BS in computer science from UC Berkeley.

**Nimmi Rangaswamy** is a researcher with Microsoft Research India. She is a social anthropologist working in ICTD research.

**Krishna Savani** is an assistant professor of management and organization at the National University of Singapore. He holds a PhD in psychology and a BA in economics, both from Stanford University.

**Kapil Shah** is managing trustee of Jatan Trust, based in Gujarat, India.

**S. Revi Sterling** is cofounder and director of the ICTD professional master's program at the ATLAS Institute, University of Colorado Boulder. Previously, she spearheaded Microsoft Research's efforts in gender equity in computer science. She has served on the leading gender and technology boards and consults actively on ICTD efforts.

**William Thies** is a researcher at Microsoft Research India, where he is a member of the Technology for Emerging Markets group.

**Jesus Virseda** is a researcher in the Planning and Learning Research Group at Carlos III University in Madrid. He holds an MSc in computer science from Carlos III University.
