

Contributors

Tosin Aiyelokun is a Research Assistant in the Department of Informatics at the University of California, Irvine. He researches cultural aspects of technology to support human-centered system design with an emphasis on software engineering practices.

Nosheen Ali is an Andrew W. Mellon/ACLS Early Career Fellow at Cornell University. Her research includes the anthropology of ICTs in development. She is a founding member of the international network GRASP (Group for Research in the Anthropology, Sociology, and Politics of Pakistan) and also serves on the editorial board of the South Asian journal, SAMAJ.

Yaw Anokwa is a PhD student in the Computer Science and Engineering department at the University of Washington. He likes to build, deploy, and evaluate technologies for emerging regions. He also runs Change, an ICTD research group, at the University of Washington.

Ramnath Bhat is co-founder of the Bangalore-based media collective, Maraa, devoted to community media, the arts, public space, gender, and sexuality.

Andy Dearden is a Reader in e-SocialAction at Sheffield Hallam University. He currently chairs the International Federation for Information Processing (IFIP) special interest group 13.1 on Interaction Design and International Development.

Krista Donaldson is the Executive Director of D-Rev: Design for the Other 90%, a non-profit based in Palo Alto, California. She is a lecturer and researcher in the Hasso Plattner Institute of Design ("the d. school") at Stanford University.

Maxine Frank holds a Masters degree in Communication from Manipal University, India and was the local ethnographic researcher for the StoryBank project.

David Frohlich is Director of the Digital World Research Centre at the University of Surrey and Professor of Interaction Design. He is the Founding Editor of the international journal Personal and Ubiquitous Computing, Visiting Professor at Manchester Business School, and Fellow of the Royal Society for the

Encouragement of Arts, Manufactures and Commerce (RSA).

Melissa R. Ho is a PhD candidate in the School of Information at the University of California, Berkeley. She is a co-founder of the De Novo Group, which works to bridge the gap between university research and impact in developing regions.

Matt Jones is a Professor of Computer Science in the Future Interaction Technology Lab, Swansea University. He is a Fellow of the British Computer Society and Research Chair of the British HCI Group.

Erica J. Johnson is a Post-Doctoral Fellow in Central Asian Studies at the Center for Eurasian, Russian and Eastern European Studies at Georgetown University. She was a research assistant on the CAICT project while earning her doctoral degree in Political Science at the University of Washington.

Matthew Kam is an Assistant Professor in the Human-Computer Interaction Institute at Carnegie Mellon University. He works on educational technologies for developing regions. He previously participated in a microfinance technology project in Uganda, under a fellowship from the United Nations and the University of California, Berkeley.

Beth Kolko is an Associate Professor in the Department of Human Centered Design and Engineering at the University of Washington. Her current research develops the idea of diversity and technology by focusing on information and communications technologies in developing countries. She is a Fellow at the Berkman Center for Internet & Society, Harvard University.

Mounia Lalmas holds a Microsoft Research/RAEng Research Chair in the Department of Computing Science at the University of Glasgow. She is also the (elected) Vice Chair of ACM SIGIR.

Rowena Luk is a Senior Engineer at Dimagi Inc., a software consultancy focusing on low-cost healthcare technology for the developing world. She is the founder of AMITA Telemedicine, a Canadian non-profit, and is a former member of the Intel Research Lab and the Technology and Infrastructure for Emerging Regions (TIER) research group at the University of California, Berkeley.

Neema Moraveji is a PhD student in the Learning Sciences and Technology Design at Stanford University. He designs systems to improve learning opportunities in formal and informal environments.

Vikram Parmar is an Assistant Professor in the faculty of Industrial Design and Engineering at the Delft University of Technology, The Netherlands. His research involves developing ICT-based product and services for emerging markets. As an HCI designer, his expertise lies in designing socially and contextually-aware interactive devices.

Donald J. Patterson is an Assistant Professor in the Department of Informatics at the University of California, Irvine. He serves as director of the Laboratory for Ubiquitous Computing and Interaction, He researches advanced applications, algorithms, and systems that utilize intelligent context to support situated computing.

Cynthia Putnam is a PhD candidate in the Department of Human Centered Design and Engineering at the University of Washington. Her research focuses on how design/development teams leverage user research in the process of creating human-centered technology products.

Divya Ramachandran is a PhD candidate affiliated with both the Berkeley Institute of Design and Technology and the Technology and Infrastructure for Emerging Regions (TIER) research group at the University of California, Berkeley. She works on designing mobile phone applications for rural health workers.

Kiriaki Riga is an independent researcher specializing in organizational psychology, career consultancy, and coaching.

Emma Rose is a PhD candidate in the Department of Human Centered Design and Engineering at the University of Washington. Her research focuses on designing for digital inclusion, specifically by understanding the information and communication needs of resource-constrained communities and contexts.

Carolyn P. Rosé is an Assistant Professor in the Language Technologies Institute and the Human-

Computer Interaction Institute at Carnegie Mellon University. Her research focuses on Discourse Analysis and Computer Supported Collaborative Learning. She is the Treasurer of the International Society of the Learning Sciences.

Dorothy Rachovides is currently an independent user experience consultant/researcher.

Roni Rosenfeld is a Professor of Language Technologies, Machine Learning and Computer Science at Carnegie Mellon University. He is a past NSF Graduate Fellow and a recipient of the Allen Newell Medal for Research Excellence. His research interests include speech technologies for international development.

Yael Schwartzman holds an M.S. degree from the University of Washington Computer Science and Engineering Department. She is the co-founder of DigitalICS, a Mexican-based company that provides mobile and Web-based technologies to organized smallholders in Latin America.

Jahanzeb Sherwani is an Adjunct Professor at the Language Technologies Institute in the School of Computer Science at Carnegie Mellon University. His research focuses on speech and mobile technologies in developing regions. He is also the Founder and CEO of iTeleport LLC, a mobile application startup.

Susan Elliott Sim is an Assistant Professor in the Department of Informatics at University of California, Irvine. Her primary research area is empirical software engineering, with particular attention to program comprehension, source code searching on the Web, research methodology, and software process for small companies.

Thomas N. Smyth is a PhD candidate in the School of Interactive Computing at the Georgia Institute of Technology. His research focuses on new media technologies and civic engagement in developing countries.

Roger Tucker is Director of both Sonocent Ltd. and the UK not-for-profit Outside Echo Ltd. He is a visiting fellow at the Department of Computer Science at Bristol University.
