

Contributors

Nabeel Farooq Butt is currently a Ph.D. student at the University of Waterloo, Canada. Previously, he has worked as a Research Associate in Dritte.org where he worked on networked systems for the developing world.

Shakeel Butt is currently a Ph.D. student in the Computer Science department at Rutgers University. Previously, he has worked as a Research Associate in dritte.org where he worked on the architecture of the DitTorrent peer-to-peer system.

Ahsan Latif Chudhary is a Research Associate in Dritte.org, where his work focuses on problems of information access in the developing world. Chudhary holds a Master's in Computer Science from Carnegie Mellon University.

Rikin Gandhi is an Assistant Researcher in the Technology for Emerging Markets group at Microsoft Research India and is also Chief Executive Officer of Digital Green.

Ganesh Ghimire is a freelance anthropologist working in Kathmandu, Nepal.

Pat Hall, retired from the UK Open University in 2005, is currently Visiting Professor in the Department of Computer Science and Engineering at Kathmandu University in Nepal, and an International Collaborator in the Localisation Area of the Centre for Next Generation Localisation (CNGL) in Ireland.

Kathi Kitner is a cultural anthropologist and Senior Research Scientist in the People and Practices Research group at Intel Research. She has conducted applied research on social change, technologies and development in Mexico, Venezuela, Chile, the Caribbean, Brazil and the United States.

Renee Kuriyan is a Research Scientist in the People and Practices Research group at Intel Research. She has a background in development studies focused in India and East Africa. Her research looks at the cultural politics of consumption, the middle class, and ICTD.

Ghulam Murtaza is a Ph.D. candidate in the Computer Science Department at LUMS, Pakistan. His research focuses on improving the accessibility and performance of Internet in the developing world.

Sergiu Nedeveschi is a Postdoctoral Researcher with the International Computer Science Institute, associated with Intel Research Berkeley. He is currently investigating solutions for green, energy-efficient networks. He is also interested in the economic and social aspects of computer networking in developing regions.

Maria Newton is a socio-linguist currently studying in London, UK, to teach English as a Foreign Language.

Joyojeet Pal is a Postdoctoral Research Associate at the Center for Information and Society at the School of Information, University of Washington. His recent work is on children's use of computers in the developing world.

Balaji Parthasarathy is the ICICI Associate Professor at the International Institute of Information Technology, Bangalore.

Rabin Patra is a Ph.D. candidate in the Department of Electrical Engineering and Computer Science at the University of California, Berkeley. His current research interests are developing innovative and cost-effective communication technologies tailored for the disadvantaged regions of the world.

Udai Singh Pawar works as an Assistant Researcher with the Technologies for Emerging Markets Group at Microsoft Research India in Bangalore. His current research interests are in IT for rural education—where he has worked on novel hardware and software interfaces for rural settings.

Madelaine Plauche is a research associate in the Human Language Technologies Research Group at the Meraka Institute in South Africa. Her recent work is in developing multilingual open source software tools for humanitarian organizations, especially considering the human factors in speech recognition based interfaces.

Krithi Ramamritham is the Vijay and Sita Vashee Chair Professor in the Department of Computer Science and Engineering at the Indian Institute of Technology Bombay. During the past few years, he has been interested in the use of Information and Communication Technologies for creating tools aimed at socio-economic development.

CONTRIBUTORS

Vanaja Ramprasad is Managing Trustee and Director of GREEN Foundation and a Member of the IFOAM World Board.

Umar Saif is Associate Professor of Computer Science in the School of Science and Engineering at LUMS, Pakistan. His research interests broadly span computer systems with a particular focus on ICT for Development. Dr. Saif leads the Dritte.org initiative on developing world technologies.

Kentaro Toyama is Assistant Managing Director of Microsoft Research India, where he also leads the Technology for Emerging Markets group as a Principal Researcher.

Rajesh Veeraraghavan is a Ph.D. candidate in the School of Information at the University of California, Berkeley and was formerly an Associate Researcher at Microsoft Research India.

Naga Yasodhar is an Assistant Manager at Citigroup and was formerly an Intern at Microsoft Research India.
